Overview

Versatile Surface Preparation Solution

This gasoline-powered floor scarifier and milling machine is a professional-grade tool engineered for heavy-duty surface preparation. It excels in removing cold marking paint, elastic floor coatings, and heat insulation paint, while also performing effectively on asphalt and cement surfaces. Designed for durability and efficiency, it features adjustable cutting depths and an anti-vibration system to ensure reliable operation in demanding construction and maintenance environments.

Technical Specifications

Performance Highlights

9 HP Engine Power	250 mm Milling Width	110 KG Machine Weight
-----------------------------	--------------------------------	---------------------------------

Milling Performance

Metric	Specification
Milling Depth	3-5mm
Cutter Arbor	6 pieces
Total Blade Count	102 pieces
Blade Life	8000-9000sqm

Features

Operational Features

- Precision cutting depth adjustment
- Anti-vibration mounts for operator comfort
- Integrated dust control outlet
- Easy-control engine stop switch
- Interchangeable cutter options

Applications

Typical Applications	Paint Removal, Asphalt Surface Treatment, Concrete Milling, Snow and Ice Removal, Surface Leveling
-----------------------------	--
