

Gasoline Powered Garden Tiller

This compact tiller is designed for small-scale farming and gardening. Its gasoline-powered engine drives rotating tines to break up and aerate the soil.

Overview

Compact Gasoline Garden Tiller

This gasoline-powered garden tiller is designed for efficient soil preparation in small-scale farming and gardening applications. Featuring a robust engine and adjustable handlebars, it provides the maneuverability needed for breaking up soil, weeding, and preparing seedbeds. Its durable frame and compact design ensure reliable performance in confined spaces.

Technical Specifications

Power Source	Gasoline
Primary Applications	Soil Aeration, Seedbed Preparation, Weeding, Small-scale Farming

Design & Features

Maneuverability

- Dual-wheel design
- Adjustable handlebars
- Compact, lightweight frame

Build Quality

Sturdy Frame • Durable Components
