

Gasoline Powered Hedge Trimmer

The gasoline powered hedge trimmer is a robust tool for maintaining hedges and shrubs. It features a high-performance gasoline engine, dual-action cutting blades, and ergonomic design.

Product Overview

Professional Hedge Maintenance

This gasoline-powered hedge trimmer is a robust and efficient tool engineered for the precise maintenance of hedges and shrubs. Featuring a high-performance engine, it ensures reliable power and extended run times for demanding landscaping tasks. The ergonomic design, complete with vibration dampening, minimizes operator fatigue, making it an ideal choice for both professional landscapers and serious homeowners.

Technical Specifications

Power Source	Gasoline Engine
Blade Configuration	Dual-action cutting blades

Features & Safety

Ergonomic Features

- Comfortable handle design
- Vibration dampening system

Suitable For

Professional Landscaping • Home Garden Maintenance

Safety Features	Blade Guard, Throttle Lock
