

Gasoline Powered Hedge Trimmer with Rotating Handle

This gasoline hedge trimmer features a newly designed engine and gear case for increased reliability. Its multi-function rotating handle provides comfortable operation at various angles.

Product Overview

Professional Performance and Comfort

This gasoline-powered hedge trimmer is engineered for efficiency and durability in demanding landscaping environments. It utilizes a high-precision gear case with imported bearings to ensure a longer service life and reliable operation. The design prioritizes user comfort through a lightweight magnesium alloy wheel case and a multi-function rotating handle that adapts to various working angles.

Engine & Performance

Key Performance Metrics

22.5 cm³

Displacement

0.65 kW

Power Output

0.88 hp

Power Output

Engine Model	1E32FL-S
Fuel Tank Capacity	0.5 L

Technical Specifications

Cutting Width	600 mm
Net Weight	5.7 kg
Reduction Ratio	5.1:1 (46:9)
Package Dimensions	1150 x 265 x 260/130 mm

Features & Compliance

Key Design Features

- Rotating handle for multi-angle operation
- Magnesium alloy wheel case
- Hollow-out blade and blade holder design
- High-precision imported bearings

Certifications	CE
