Overview

Professional Cleaning Performance

This gasoline-powered high-pressure washer is engineered for demanding cleaning tasks, combining a robust engine with a high-pressure pump for exceptional results. Designed for both residential and commercial applications, it effectively removes dirt, grime, and debris from diverse surfaces like driveways, decks, and vehicles. The unit prioritizes durability and ease of use, featuring a sturdy frame for maneuverability and integrated safety systems to ensure long-lasting reliability.

Performance Metrics

Key Performance Indicators

2800 PSI

Max Pressure

2.3 GPM

Flow Rate

Technical Specifications

Safety Systems

- Thermal relief valve
- Automatic shut-off

Model Variants

PCMB2522XB, PCMB2523XA

Design & Utility

Design Highlights

Durable Frame • Wheeled Mobility • Adjustable Spray Patterns • Detergent Tank
