

Gasoline Powered High Pressure Washer

This high-pressure washer is a robust and powerful cleaning tool designed for demanding applications. Featuring a gasoline-powered engine, it delivers high-pressure water flow for effective removal of dirt, grime, and other stubborn residues from various surfaces.

Product Overview

Professional Cleaning Power

This gasoline-powered high-pressure washer is engineered for demanding cleaning tasks, offering a robust solution for removing stubborn dirt and grime. Designed for both professional and heavy-duty residential applications, it features a reliable 4-stroke engine and a mobile, wheeled frame for easy transport. With a 2500 PSI pressure rating and a 2.3 GPM flow rate, it provides the consistent power needed for effective surface maintenance.
