

Gasoline Powered Lawn Scarifier

This gasoline-powered lawn scarifier is designed for effective lawn maintenance. It utilizes rotating blades or tines to remove thatch, moss, and dead grass, promoting healthier lawn growth.

Overview

Professional Lawn Maintenance

The CJG-1001 Gasoline Lawn Scarifier is a robust machine engineered for effective lawn care and thatch removal. By utilizing a powerful gasoline engine, it efficiently clears moss and dead grass to promote healthier lawn growth. Designed for operator comfort and safety, it features an ergonomic foldable handle, adjustable working depths, and essential safety mechanisms like an engine kill switch.
