

Gasoline Powered Mini Tiller

This mini tiller is a compact and lightweight gardening tool designed for tilling and cultivating small areas. It features a gasoline-powered engine, providing sufficient power for breaking up soil and preparing seedbeds.

Overview

Compact Power for Soil Preparation

This gasoline-powered mini tiller is designed for efficient soil cultivation in home gardens, flower beds, and vegetable patches. Featuring a robust engine that is interchangeable with brush cutter systems, it provides versatile performance for various landscaping needs. The unit is engineered for stability and ease of use, ensuring reliable operation even at high temperatures.

Technical Specifications

Fuel/Oil Mixing Ratio	1:25
Engine Compatibility	Interchangeable with brush cutters

Safety & Reliability

Safety Features	Short circuit protection, Plug type flameout wire
