

Gasoline Powered Mini Tiller

This gasoline-powered mini tiller is designed for agricultural use. It features a 170F gasoline engine with gear driving transmission and CVT gear shifting.

Overview

High-Performance Gasoline Mini Tiller

This gasoline-powered mini tiller is engineered for versatile agricultural applications, providing robust performance for soil cultivation. Featuring a reliable 7.0HP gasoline engine and advanced gear-driving transmission, it ensures consistent power delivery and efficient operation. Designed with adjustable tilling depth and width, this equipment offers the flexibility required for various farming tasks while maintaining a durable build.

Engine & Performance

Maximum Power

7 HP

Max Power

3600 rpm

Rated Speed

Starting Method

Recoil Start

Engine Model

170F Gasoline Engine

Technical Specifications
