

Gasoline Powered Pole Hedge Trimmer

This pole hedge trimmer is powered by a gasoline engine and features a long reach for trimming tall hedges. It is equipped with a dual-action cutting blade and adjustable cutting head for efficient trimming at various angles.

Product Overview

Professional Reach and Performance

This gasoline-powered pole hedge trimmer is engineered for maintaining tall hedges and shrubs with precision and ease. By eliminating the need for ladders, it ensures safer and more efficient operation for landscaping tasks. The unit features a robust engine, an adjustable cutting head for versatile angles, and an extended reach design, making it an essential tool for professional-grade hedge maintenance.

Key Features

Core Capabilities

- Gasoline-powered engine for reliable performance
- Dual-action cutting blade for clean, efficient cuts
- Adjustable cutting head for multi-angle trimming
- Extended pole design for high-reach applications
- Ergonomic handle system for operator comfort

Operational Highlights

No-Ladder Operation, Adjustable Angle, Ergonomic Design, High Reach
