

Gasoline Powered Portable Water Pump

This portable water pump is designed for various applications. It features a robust construction for durability and reliable performance.

Product Overview

High-Performance Portable Pumping Solution

The MGPU40A is a versatile, gasoline-powered portable water pump engineered for reliable performance in diverse environments. Its robust construction ensures long-term durability, while the gasoline engine provides efficient water transfer capabilities. Designed for portability, its compact and lightweight frame allows for easy transport and operation across irrigation sites, construction zones, and general water removal applications.

Performance Metrics

Power Source	Gasoline Engine
Primary Applications	Irrigation, Construction, Water Removal

Physical Characteristics

Design Benefits

- Compact form factor
- Lightweight construction
- Robust build quality
- Portable design
