

Gasoline Powered Pressure Washer

This pressure washer delivers a powerful 2500 PSI and 2.3 GPM. It is designed for versatile cleaning applications and features a gasoline engine and durable frame.

Overview

Professional Cleaning Performance

This gasoline-powered pressure washer is engineered for high-performance cleaning across a variety of demanding environments. With a robust design and adjustable pressure settings, it provides users with precise control for versatile applications. Built for reliability and durability, this machine delivers consistent power to tackle tough cleaning tasks effectively.
