

Gasoline Powered Self-Propelled Lawn Mower

This self-propelled lawn mower is designed for residential use. It features a gasoline-powered engine, adjustable cutting deck, and a collection bag.

Product Overview

Professional Performance in Residential Mowing

The WR65700B is a high-performance gasoline-powered lawn mower engineered for efficient maintenance of small to medium-sized residential lawns. Its self-propelled design minimizes operator fatigue, while the adjustable cutting deck ensures precise lawn care tailored to specific grass heights. Designed with durability and ease of storage in mind, this unit features a convenient foldable handle for compact organization when not in use.
