

Gasoline Powered Water Pump

This gasoline powered water pump is a robust solution for water pumping needs. Its gasoline engine provides portability and high performance for water transfer in agriculture, construction, and emergency scenarios.

Product Overview

Reliable Water Transfer Solution

The Gasoline Water Pump Set G50C is a robust and reliable solution engineered for various water pumping applications. Designed for portability and high performance, it is an ideal choice for agricultural, construction, and emergency water transfer needs. Featuring a durable pump housing and efficient impeller design, this unit ensures consistent flow and pressure in demanding environments.

Technical Specifications

Pump Type	Gasoline Powered Water Pump
Model	G50C
Key Features	Durable Housing, Efficient Impeller, Portable Design, Sturdy Frame

Applications

Suitable Applications

- Agricultural irrigation
- Construction site dewatering
- Emergency water transfer
