

Gasoline Powered Water Pump

This portable water pump is designed for drainage and irrigation. It features a gasoline-powered engine and a protective roll cage, making it suitable for remote locations and demanding environments.

Overview

Professional Grade Water Pump

This portable gasoline-powered water pump is engineered for high-performance drainage and irrigation tasks in demanding environments. Equipped with a robust 6.5HP engine, it provides reliable power for operations in remote locations without access to electrical grids. The unit features a durable protective roll cage, ensuring stability and long-term service life in rugged agricultural and construction settings.

Technical Specifications

Engine Power

6.5 HP

Rated Power

Model Identifier

STHP15

Application Suitability

Primary Applications

Agricultural Irrigation, Construction Drainage, Remote Site Operation

Design Features

Structural Design

- Gasoline-powered mobility
- Protective roll cage chassis
- Compact portable design
