

Gasoline Powered Water Pump

This high-performance gasoline water pump is designed for efficient water transfer and irrigation. It features a robust gasoline engine, durable construction, and a compact design, making it ideal for agricultural, construction, and emergency water removal applications.

Overview

High-Performance Gasoline Water Pump

This high-performance gasoline water pump is engineered for efficient water transfer and irrigation tasks. Featuring a robust engine for reliable power and a durable construction, it is designed for long-lasting performance in demanding environments. The compact design ensures easy portability, making it an ideal solution for agricultural, construction, and emergency water removal applications.

Technical Specifications

Available Sizes

- 2 inch
- 3 inch
- 4 inch

Engine Models

- MT310
- MX110

Engine Power

2.5 HP

Rated Power

Certifications

Compliance & Standards

CE, BSCI, amfori

Design Features

Key Features

Protective Frame • Compact Design • High Flow Rate • High Suction Lift
