Overview

High-Performance Water Transfer Solution

This gasoline-powered water pump is engineered for high-volume fluid transfer in demanding professional environments. Featuring a robust engine and durable frame, it provides reliable performance for irrigation, large-scale construction sites, and emergency water removal tasks. The design prioritizes portability and operational efficiency, making it a versatile tool for both clean and dirty water applications.

Technical Specifications

Engine Power

7 HP

Engine Power

Model	WP30A
Max Flow Rate	60 m ³ /h
Inlet/Outlet Size	80mm (3 inch)
Total Head	36 m
Suction Head	8 m
Fuel Tank Capacity	0.9 L

Features

Design Highlights

- Protective frame for portability and durability
- Electronic ignition system
- Fuel-efficient engine design
- Easy-start operation

Suitable Applications

Irrigation, Construction, Emergency Water Removal, Clean Water, Dirty Water
