

Gasoline Powered Water Transfer Pump

This gasoline water pump set is designed for efficient water transfer in agricultural and irrigation applications. It features a robust gasoline engine for reliable power, a durable pump housing for longevity, and a portable frame for easy transport.

Overview

Efficient Water Transfer Solution

This gasoline-powered water transfer pump is engineered for high-performance water movement in agricultural and irrigation settings. Built with a robust engine and a durable housing, it ensures reliable operation for drainage and general pumping tasks. The portable frame design allows for easy transport across various work sites, making it an essential tool for demanding outdoor applications.

Technical Specifications

Power Source	Gasoline Engine
Primary Applications	Agricultural Irrigation, Field Drainage, General Water Transfer

Features

Key Design Features

- Robust gasoline engine for reliable power
- Durable pump housing for extended longevity
- Portable frame for easy transport and maneuverability
