

Gasoline Powered Water Transfer Pump

This gasoline water pump set is a portable and self-priming pump suitable for various water transfer applications. Its gasoline engine provides power, making it ideal for irrigation, drainage, construction sites, and general water pumping tasks.

Overview

Reliable Water Transfer Solution

This gasoline-powered water transfer pump is a portable, self-priming unit engineered for diverse water management tasks. Designed for versatility, it operates independently of electrical grids, making it ideal for irrigation, construction site drainage, and general water transfer. Its robust frame ensures durability and easy transport, while the high-efficiency impeller and easy-start mechanism guarantee consistent, reliable performance in demanding environments.

Key Features

Performance Highlights

1 Gasoline

Engine Type

1 Self-priming

Priming

Typical Applications

Irrigation, Construction Drainage, Water Transfer

Technical Details

Design Specifications

- Robust protective frame
- Durable pump housing
- Efficient impeller design
- Easy start mechanism
