

Gasoline Powered Water Transfer Pump

This gasoline-powered water pump features a 1-inch inlet and outlet. It has a pump lift of 30 meters and a flow capacity of 8 cubic meters per hour.

Overview

High-Performance Gasoline Water Pump

This 2-stroke gasoline-powered water transfer pump is engineered for efficiency and reliability in demanding environments. Featuring a 1-inch inlet/outlet configuration, it is an ideal solution for agricultural irrigation, construction site dewatering, and emergency water removal tasks. Its compact and portable design ensures easy transport, while the gasoline engine provides the necessary power for consistent performance without the need for an external power source.
