

Gasoline Powered Wood Chipper Shredder

This garden wood chipper shredder is a powerful and efficient machine designed for processing branches, twigs, and other yard waste. It features a robust gasoline engine for reliable performance and a large hopper for easy feeding of materials.

Overview

High-Performance Wood Processing

This gasoline-powered wood chipper shredder is engineered for efficient yard waste management, capable of processing branches and twigs into useful mulch. Equipped with a robust 13hp engine, it provides the power necessary for demanding landscaping and composting tasks. The unit features a portable design with wheels for easy maneuverability, ensuring it can be used effectively across various job sites.

Engine Performance

Engine Metrics

13 hp

Horsepower

7.7 kw

Output Power

389 cc

Displacement

Engine Specifications

- 4-stroke
- Air-cooled
- Recoil start mode

Operational Capacity

Operational Speeds

Metric	Value	Unit
No load speed	3600	r/min
Max cutting speed	2000	r/min

Max Chipping Capacity 4 inch x 2 inch (50mm)

Fuel Tank Capacity 6.5 L

Design Features

Key Features Portable Design, Wheeled, Hardened Steel Blades, Emergency Shut-off
