Product Overview

Professional Ride-On Power Trowel

This gasoline-powered ride-on trowel is engineered for high-efficiency concrete finishing, providing exceptional compaction and smoothing capabilities. Featuring a robust Honda engine and a maintenance-free aluminum alloy gearbox, it offers reliable performance for large-scale industrial and commercial construction projects. The unit is designed with a durable carbon structural steel frame and an ergonomic operator station, ensuring long service life and ease of control.

Performance Metrics

Engine Power

24 hp

Power Output

Operational Data

Metric	Value
Working Diameter	2000 mm
Working Speed	0-135 rpm
Total Weight	440 kg

Technical Specifications

Blade Configuration

- 8 total blades
- Individual blade size: 350 x 150 mm

Fluid Capacities

20 L

Fuel Tank

1.8 L

Lubricating Oil

Key Features

Centrifugal Clutch, Aluminum Alloy Gearbox, Corrosion-Resistant Finish, Heat-Treated Structural Steel
