

# Gasoline Rotary Tiller

This rotary tiller is designed for soil preparation in agricultural and gardening applications. It features rotating tines to break and aerate the soil and adjustable handles for operator control.

## Product Overview

### Professional Soil Preparation Solution

This gasoline-powered rotary tiller is engineered for efficient soil cultivation and preparation in agricultural and gardening settings. Featuring a robust frame and protective safety guards, it is designed to withstand demanding field conditions while ensuring operator stability. The adjustable handle system allows for precise control during operation, making it an essential tool for breaking up and aerating soil effectively.

## Technical Specifications

### Application Areas

- Agricultural soil preparation
- Garden cultivation
- Soil aeration

### Power Source

Gasoline Engine

### Equipment Type

Rotary Tiller / Cultivator

### Key Features

Adjustable Handles, Protective Guards, Integrated Kickstand, Robust Frame
