

Gasoline Water Pump

This gasoline water pump is designed for various water transfer applications. It delivers reliable performance for irrigation, construction, and emergency water removal.

Product Overview

Professional Water Management

This portable gasoline-powered water pump is engineered for high-performance water transfer in demanding environments. It serves as a reliable solution for agricultural irrigation, construction site dewatering, and emergency flood mitigation. With a focus on durability and self-priming convenience, this pump is designed to provide efficient, long-term operation for both professional and domestic requirements.

Key Features

Highlights

Portable, Self-Priming, Gasoline Engine, High Flow Rate, Compact Design

Performance

Operational Specs

2 inch
