

Gasoline Water Pump

This gasoline water pump is designed for efficient water transfer in various applications. It features a durable construction with a protective frame, ensuring longevity and reliability.

Overview

Efficient Water Transfer Solution

This gasoline-powered water pump is designed for reliable and efficient water transfer across various professional applications. Featuring a robust protective frame for enhanced durability, it is built to perform in demanding environments. It is an ideal choice for irrigation, drainage, and general water pumping tasks, offering consistent operation and easy maintenance.

Performance

Key Performance Metrics

28 m

Total Lift

8 m

Max Suction

Technical Specifications

Inlet Size	50mm (2 inch)
Outlet Size	50mm (2 inch)

Engine Details

Engine Model	YM168
Continuous Operating Hours	2.8 h
Fuel Tank Capacity	3.6 L
