

Gasoline Water Pump

This gasoline-powered water pump is designed for efficient water transfer. Its robust engine, durable pump housing, and sturdy frame ensure reliable operation for applications like irrigation and construction.

Product Overview

Professional Gasoline Water Pump

The QDZ40-25 is a high-performance gasoline-powered water pump engineered for reliable water transfer in demanding environments. Featuring a robust engine and a durable pump housing, this unit is ideal for irrigation, construction sites, and agricultural applications. Its compact, portable frame design ensures ease of transport and quick setup wherever water displacement is required.

Technical Specifications

Engine Power

2.5 HP

Engine Power

Model Number

QDZ40-25

Features & Applications

Key Features

- Robust engine construction
- Durable pump housing
- Sturdy portable frame
- Easy-access inlet and outlet ports

Primary Applications

Irrigation, Construction, Water Transfer
