

Gasoline Water Pump for Irrigation and Construction

This gasoline water pump is designed for efficient water transfer in various applications. It features a powerful gasoline engine for reliable performance and a durable pump housing for long-lasting use.

Product Overview

Professional Grade Water Pump

This gasoline-powered water pump provides a robust and reliable solution for professional water transfer needs. Engineered for versatility, it is an ideal choice for large-scale irrigation tasks, construction site drainage, and emergency flood mitigation. Its durable construction ensures consistent performance even in challenging environmental conditions.

Technical Specifications

Engine Power

2.5 HP

Engine Output

Model Identifier

HP50B

Application Areas

Use Cases

Irrigation, Construction, Emergency Water Removal, Agricultural Drainage

Build Quality

Key Features

- Powerful gasoline engine
- Durable pump housing
- High-efficiency fluid transfer
- Portable design for field use
