

Gasoline Water Pump for Irrigation and Water Removal

This gasoline water pump features a compact structure, mini body, and low noise design for ease of use. It is suitable for irrigation, construction, and emergency water removal.

Product Overview

Compact and Efficient Water Management

This gasoline-powered water pump is engineered for versatility, serving as an ideal solution for irrigation, construction projects, and emergency water removal. Designed with a compact structure and a mini body, it offers excellent portability without sacrificing power. Its low-noise operation ensures it is suitable for various environments, while the user-friendly design facilitates easy handling and maintenance for your daily operations.

Technical Specifications

Power Output	2.2 kW
Model Number	WWQGZ40-20
Engine Type	Gasoline

Features

Key Features	Compact Design, Low Noise, Easy Operation, Portable
--------------	---

Applications

Suitable For

- Agricultural Irrigation
- Construction Sites
- Emergency Water Removal
