

Gasoline Water Transfer Pump

This gasoline-powered water pump is designed for efficient water transfer. Its compact design and carrying handle ensure portability and it is suitable for irrigation, construction, and emergency water removal.

Overview

Reliable Water Transfer Solution

This gasoline-powered water pump is engineered for high-efficiency water transfer across diverse environments. Featuring a robust engine and durable pump housing, it is built to withstand demanding tasks such as irrigation, construction site dewatering, and emergency water removal. Its compact design and integrated carrying handle ensure excellent portability without compromising on performance.

Key Features

Design Highlights

- Robust engine performance
- Durable pump housing
- Stable base for operation
- Compact and portable design
- Integrated carrying handle

Suitable Applications

Irrigation, Construction, Emergency Water Removal
