

Gate Operator Speed Reducer

This speed reducer is designed for gate operation, providing efficient and reliable power transmission. The reducer features a robust construction suited for demanding industrial environments, ensuring durability and long service life.

Product Overview

High-Efficiency Speed Reducer

This industrial-grade speed reducer is engineered specifically for gate operation, delivering reliable power transmission and torque amplification. Built with a focus on durability, its robust construction ensures consistent performance in demanding environments. Its compact design allows for seamless integration into various automated gate systems, providing precise speed control.

Product Certifications

International Certifications

ISO 9001, CE

Manufacturing Capabilities

Available Product Types

- Worm gear speed reducer (iron steel cases)
- Motovario type aluminum case worm gear speed reducers
- SEW type helical gear speed reducers
- Sumitomo type cyclo drive gearboxes
- ROTEX type jaw coupling
- Flange coupling
- Door operators

Production Capacity Metrics

500 employees

Total Workforce

25 Million USD

Annual Output
