

# Gear Case with Central Shaft

This gear case is designed for use in mechanical or electromechanical systems. It features a central shaft and is constructed from durable white plastic components.

## ADDITIONAL IMAGES

## Product Overview

### Precision Gear Case Assembly

This gear case is engineered for reliable rotational motion transmission in mechanical or electromechanical systems. Featuring a durable white plastic housing and a robust central shaft, it is designed for secure integration into larger assemblies. The unit includes a specialized square shaft and a pulley system, making it an essential component for motion control applications.

## Technical Specifications

### Shaft Dimensions

**9 mm**

Shaft Width

**33 mm**

Total Shaft Length

### Mounting Configuration

Feature	Specification
Outer Holes	6
Screws	6

Pulley Diameter	148 mm
