

# Gear Shaft Brake for Tractors

This gear shaft brake is designed for use in tractors. It provides reliable braking performance.

## Product Overview

### Gear Shaft Brake Assembly

This high-performance gear shaft brake is engineered specifically for use in agricultural tractor systems. Designed for durability and precision, these components serve as essential spare parts to maintain reliable braking performance and efficient power transmission. Ideal for heavy-duty agricultural operations, these parts ensure the longevity and functionality of your machinery.

## Technical Specifications

High-durability gear-shaft and brake assembly designed for tractor power transmission and braking systems.

### Supported Tractor Series

- L1500
- L2201
- L2202
- L2402
- L3408
- L3608
- L4508
- L4708
- L5018
- M6040
- M5000
- M7040
- M8540
- M9540
- M9000
- M105
- M1304

<b>Compatible Part Numbers</b>	3A111-48460, 3c315-48460
<b>Primary Tractor Compatibility</b>	M6040
<b>Component Category</b>	Gear-Shaft and Brake Assembly
<b>Applicable Machinery</b>	Wheel Tractors
