

Geared Trolley - M Type, 610 Series

The GCL 610 Series (M type) geared trolley is designed for the smooth, efficient horizontal movement of heavy loads. Its geared mechanism allows precise and controlled movement, ensuring the safe and accurate positioning of materials.

Overview

Robust Material Handling Solution

The 610 Series M-Type Geared Trolley is engineered for the efficient and precise horizontal movement of heavy loads in demanding industrial settings. Designed with durability in mind, this heavy-duty trolley features a geared mechanism that allows for controlled positioning and smooth operation. It is a versatile choice for workshops, warehouses, and construction sites requiring reliable load management.

Key Features

Key Features

- Heavy-duty construction for industrial durability
- Geared mechanism for precise load control
- Sealed bearings for smooth operation
- Adjustable flanges for beam compatibility
- Integrated safety latch

Application

Suitable Environments

Workshops, Factories, Warehouses, Construction Sites
