

# General Purpose Analysis Instrument

This is a general purpose analysis instrument. It is used for a variety of testing applications.

## Product Overview

### Heavy-Duty Sledge Hammer Head

This general-purpose sledge hammer head is engineered for demanding tasks, including demolition, driving stakes, and other heavy hammering applications. Constructed from hardened steel, it offers exceptional durability and impact resistance. The head features a specialized black protective coating to prevent corrosion and wear, ensuring longevity in tough working environments.

## Technical Specifications

### Surface Finish

Corrosion Resistant • Protective Coating

### Design Features

- Central eye for handle insertion
- Hardened steel construction
- Black protective finish

<b>Material</b>	Hardened Steel
-----------------	----------------

## Applications

<b>Suitable Applications</b>	Demolition, Driving Stakes, Heavy Hammering
