

General Purpose Battery

This is a general purpose battery suitable for many devices. It can be used in household electronics and portable applications.

Product Overview

General Purpose Battery Solutions

This general-purpose battery collection offers a versatile range of power solutions suitable for various applications. The product line includes multiple battery formats, including rechargeable options, designed to meet diverse energy requirements. These units are manufactured with a focus on standard specifications for reliable performance in general use cases.

Technical Specifications

Available Types

- Type 1
- Type 5
- Type 7
- Rechargeable Batteries

Country of Origin

People's Republic of China

Compliance & Standards

Export Capability

International Export Ready
