

# General Purpose Carbon-Zinc Battery

This carbon-zinc battery is designed for general-purpose electronic devices. It offers a cost-effective power solution for low-drain applications.

## Product Overview

### General Purpose Power Solution

These Super Heavy Duty carbon-zinc batteries are designed as a cost-effective power solution for a wide range of low-drain electronic devices. Engineered for reliability, they provide consistent energy output suitable for general-purpose applications. This product is manufactured using modern production techniques to ensure quality and performance consistency.

## Technical Specifications

### Duty Rating

Super Heavy Duty

### Battery Chemistry

Carbon-Zinc

### Model Identifier

ZPG-704B

### Environmental Compliance

Mercury-free, Cadmium-free

## Production & Quality

### Manufacturing Capabilities

- Automated injection molding
- Advanced battery engineering center
- High-tech materials research
- International quality standards

### Annual Production Capacity

**100000000 pcs**

Battery Units
