

General Purpose Centrifugal Water Pump

This centrifugal pump is designed for pumping clean liquids without solid or frictional matter. It is suitable for tank filling, domestic water supply, water transfer, pressure boosting, and irrigation.

Product Overview

General Purpose Centrifugal Water Pump

This centrifugal water pump is engineered for efficient and reliable liquid transfer, making it suitable for tank filling, domestic water supply, pressure boosting, and irrigation. Designed to handle clean, low-viscosity, and chemically neutral liquids, it features a robust construction with anti-rust treatment. The unit utilizes high-quality components like copper wiring and cold-rolled silicon steel sheets to ensure consistent performance and durability.

Technical Specifications

Suction Lift	8 m
Max Working Pressure	8 bar
Max Liquid Temperature	35 °C
Max Ambient Temperature	40 °C

Construction & Features

Key Features

- 100% Copper wire with automatic wiring
- Cold-rolled silicon steel sheet for high efficiency
- Stainless steel nuts with demagnetization
- Anti-rust treatment castings and electrophoresis
- Rigorous testing protocols

Compliance & Market

Main Export Markets

- America
- Russia
- Germany
- Korea
- Bangladesh
- Thailand
- Myanmar
- Kazakhstan
- Mozambique
- Malaysia
- Greece
- Sri Lanka
- Syria
- Tunisia
- Mauritius
- Algeria

Certifications

CE, RoHS, ISO9001, ISO14001, OHSAS18001

Applications

Typical Applications

- Tank filling
- Domestic water supply
- Water transfer
- Pressure boosting
- Irrigation
