

German-Type Welding Electrode Holder

This heavy-duty, German-type electrode holder is designed for professional welding. It features insulated handles and spring-loaded jaws to securely hold various sizes of welding electrodes, ensuring consistent electrical contact and efficient welding performance.

Product Overview

Professional German-Type Electrode Holder

This heavy-duty German-type welding electrode holder is engineered for professional welding applications, prioritizing both performance and operator safety. Its robust construction features fully insulated handles and jaws, ensuring reliable electrical contact while minimizing heat transfer. Designed for ergonomic comfort, this tool reduces operator fatigue during extended stick welding (SMAW) sessions.

Technical Details

Suitable Process	Stick Welding (SMAW)
Design Style	German-Type

Features

Safety & Comfort

- Enhanced operator safety through full insulation
- Ergonomic handle to minimize fatigue
- Secure electrode grip for consistent performance

Key Features	Insulated Handle, Insulated Jaws, Spring-Loaded Mechanism, Heavy-Duty Construction
