

Gigabit Ethernet Access Switch

This gigabit Ethernet access switch is designed for high-bandwidth access and Ethernet multi-service aggregation. It provides a large switching capacity and high-density GE ports.

Product Overview

High-Performance Gigabit Access Switch

This high-performance optical fiber Gigabit access Ethernet switch is engineered for demanding enterprise networks and data centers. It delivers robust connectivity through a combination of Gigabit Ethernet ports and optical fiber interfaces, ensuring high-speed data transmission and reliability. With comprehensive support for Layer 2 and Layer 3 features, including VLANs, QoS, and advanced security protocols, this switch provides a scalable solution for bandwidth-intensive applications.

Key Features

Network Features

- Layer 2 and Layer 3 support
- VLAN configuration
- Quality of Service (QoS)
- Advanced security protocols

Certifications

CE, ISO, SGS, CCC, TÜV Rheinland

Technical Specifications

Connectivity

Gigabit Ethernet • Optical Fiber Uplink

Interface Ports

1 Count

Console Port
