

Gigabit Ethernet GPON/EPON Optical Network Unit

This high-performance GPON/EPON Optical Network Unit (ONU) is designed for fiber-to-the-home (FTTH) deployments. It provides reliable high-speed internet, VoIP, and IPTV services.

SM16101-GHZ-T10

Overview

High-Performance Fiber Connectivity

This Gigabit Ethernet GPON/EPON Optical Network Unit (ONU) is engineered for seamless fiber-to-the-home (FTTH) deployments. It delivers reliable high-speed internet, VoIP, and IPTV services, ensuring a robust connection for residential and small business environments. With its compact, energy-efficient design, the unit is easy to install and features advanced Quality of Service (QoS) capabilities for optimized traffic management.

Technical Specifications

Supported Services

- High-speed Internet
- VoIP
- IPTV

Network Compatibility

GPON, EPON

Ethernet Ports

Gigabit Ethernet

Features

Key Features

Compact Design • Energy Efficient • Easy Installation • Advanced QoS

Ideal Applications

- Residential FTTH
- Small Business Networks
