Product Overview

Precision Drilling for Glass and Tile

These professional-grade drill bits are engineered specifically for clean, accurate hole creation in glass and ceramic tile surfaces. Featuring a specialized tungsten carbide tip, they are designed to minimize chipping and cracking during operation. Their robust construction ensures long-lasting performance and reliability for delicate drilling tasks.

Technical Specifications

Tip Hardness

90 HRA
Hardness

Tip Material	YG6X Carbide
Shank Material	45# Carbon Steel
Welding Method	Normal Welding

Available Sizes

Available Sizes

- 4mm
- 8mm
- 16mm

Compliance & Features

Key Features	Glass Drilling, Tile Drilling, Anti-Chipping, High Durability
