

Glass Electric Kettle with Infuser

This electric kettle is designed for boiling water and brewing hot beverages. It features a transparent glass pitcher, stainless steel infuser, and a secure lid.

Overview

Versatile Glass Electric Kettle

The CM-233 is a high-performance electric kettle designed for both boiling water and brewing infused beverages. Featuring a durable, transparent glass pitcher, it allows for clear monitoring of the water level and boiling process. The integrated stainless steel infuser makes it an ideal choice for professional or household tea preparation.
