

# Glass Electric Kettle with Stainless Steel Infuser

This electric kettle features a glass body, a stainless steel infuser, and a black plastic base. It is designed for brewing tea or boiling water, with a clear glass construction allowing visibility of the water level and brewing process.

## Product Overview

### Premium Glass Electric Kettle

This electric kettle combines a sleek glass body with a durable stainless steel infuser, offering a modern aesthetic suitable for any professional or office environment. The transparent design allows for clear visibility during the boiling or brewing process, ensuring precision and ease of use. Designed for efficiency, the unit features a compact footprint and an integrated base with intuitive power controls for rapid water heating.
