

Glass Elevator with Exterior Shaft

This elevator features a transparent glass structure. The shaft attaches to a building's facade, blending with the surrounding landscape.

Overview

Modern Exterior Glass Elevator Solution

This glass elevator system features a specialized exterior shaft design, engineered for seamless integration with modern multi-story building facades. Constructed with high-transparency glass panels, it provides unobstructed views and enhances architectural aesthetics while maintaining robust functionality. The system is designed to blend effectively with both urban environments and landscaped surroundings, offering a premium vertical transportation experience.
