

Glass Fiber Space Heater with Towel Bars

This glass fiber heater provides efficient and reliable space heating. It features a sleek, modern design with integrated towel bars and utilizes advanced glass fiber heating technology for rapid and consistent heat distribution.

Product Overview

Efficient & Versatile Heating Solution

This glass fiber space heater combines modern aesthetics with high-performance heating technology, making it an ideal choice for residential or commercial spaces. Designed with safety and energy efficiency in mind, it features an IPx4 structure and integrated stainless steel rails for convenient towel warming. With advanced controls including a weekly timer, thermostat, and window open sensor, this unit provides precise climate management while optimizing energy usage.
