

Glass-Filled Nylon Pulley for Agricultural Machinery

This glass-filled nylon pulley is designed for agricultural machinery. Its robust construction provides excellent wear resistance and load-bearing capabilities.

Product Overview

High-Performance Agricultural Pulley

This glass-filled nylon pulley is specifically engineered for demanding agricultural machinery applications. Its advanced material composition provides superior wear resistance and robust load-bearing capabilities compared to standard components. Designed for reliability in harsh field environments, this pulley ensures efficient power transmission for various agricultural equipment.

Technical Specifications

Key Performance Attributes

Wear Resistant • High Load-Bearing • Durable Construction

Material	Glass-Filled Nylon
Primary Application	Agricultural Machinery, Power Transmission
