Product Overview

High-Performance Blending Solution

This professional-grade glass jar blender features a powerful 1400W AC motor designed for efficiency in commercial and residential beverage preparation. The system includes both a large 1750ml high boron glass jar for bulk processing and a convenient 600ml BPA-free tritan bottle for on-the-go use. With variable speed controls and three dedicated automatic modes, it ensures precise, safe, and consistent results for smoothies, crushing ice, and more.
