

Globe LED Light Bulb

This globe LED light bulb offers efficient lighting solutions for various applications. It is available in multiple wattages and color temperatures, and it is compatible with E14, E27, and B22 bases.

Product Overview

Globe LED Lighting Solution

This globe-shaped LED light bulb provides efficient, reliable illumination for a variety of residential and commercial applications. Engineered for longevity and versatility, it features a durable design that ensures consistent light output. The bulb is available in multiple power configurations and is compatible with standard E14, E27, and B22 bases, making it an ideal choice for diverse lighting fixtures.

Technical Specifications

Dimensional diagram illustrating the compact globe bulb design and thermal management features.

Performance Metrics

Power (W)	Diameter (mm)	Length (mm)	Lifespan (h)	Lumen Output (lm)
5	50	82	10000	150
7	50	82	10000	246

Compatible Bases

- E14
- E27
- B22

Electrical Ratings

110V, 220V

Color Temperature Range

2700K - 6500K
