

# Go-Kart Centrifugal Clutch 3/4-Inch Bore

This centrifugal clutch is engineered for go-karts and small engine applications. It is designed to automatically engage at a specific RPM, delivering smooth acceleration and preventing engine stalling.

## Product Overview

### High-Performance Centrifugal Clutch

This centrifugal clutch is engineered for go-karts, mini-bikes, and various small engine recreational vehicles. It features a robust steel clutch drum and shoe construction designed for reliable engagement and smooth acceleration. The unit automatically engages at a specific RPM to prevent engine stalling, ensuring consistent performance for demanding applications.

## Technical Specifications

Bore Size	0.75 inch
Tooth Count	10
Compatible Chain Sizes	40, 41, 420

## Construction & Materials

### Key Components

- Clutch Drum
- Clutch Shoes

Material	Steel
----------	-------

## Performance Metrics

### Engagement Characteristics

**1 Automatic**
