

Gold-Plated Electronic Component Connector

This gold-plated component connector is designed for electronic devices. It features a cylindrical opening on the top surface.

Product Overview

Premium Gold-Plated Interface Connector

This high-precision electronic connector features a robust gold-plated body designed for superior signal conductivity and corrosion resistance. Engineered with a distinct cylindrical interface, it is specifically optimized for use in professional display equipment and computer monitors. Its compact, rectangular form factor ensures seamless integration into modern electronic assemblies, providing reliability for critical data and power transmission.

Technical Specifications

Form Factor	Rectangular
Interface Design	Cylindrical opening

Material and Build

Surface Finish	Gold-plated body, Metallic silver-colored interface
----------------	---

Application

Compatible Hardware

- Computer monitors
- Electronic devices
- Internal system ports
